OMNITACTICA: EXPANDING ENGAGEMENT & REVENUE FOR BEST COAST PAIRINGS

How OmniTactica complements BCP's tournament software with an Elo rating system, opponent scouting, and event discovery—fueling **player list-view subscriptions** and **Tournament Organizer adoption**.

100% Collaborative • Non-Competing

Drives BCP List-View Subscriptions

Fills BCP Tournament Brackets

Zero Client-Side Writes • Safe Read-Only Sync

EXECUTIVE SUMMARY: WHAT OMNITACTICA IS & HOW IT HELPS BCP

Best Coast Pairings (BCP) is the industry-leading authority for tournament pairing, timing, and official roster collection. BCP generates its revenue primarily through two subscription offerings:

1. Player Subscriptions

Subscribers gain the ability to view opponent and tournament army lists/rosters.

2. Organizer (TO) Subscriptions

Tournament directors pay subscriptions to create, manage, and ticket events on BCP.

OmniTactica is an engagement and progression layer that enhances these two revenue streams. It is not a tournament management system and does not execute pairings. Instead, it utilizes official BCP tournament match data to provide players with what they love most: **tracking their personal growth, scouting upcoming opponents, and discovering local competition.**

By answering players' questions about their opponents' skill and army records, OmniTactica creates an immediate motivation for players to unlock and inspect the opponent's exact army roster on BCP. Simultaneously, OmniTactica's event discovery engine directs players to register and purchase tickets for upcoming BCP tournaments.

HOW OMNITACTICA HELPS TABLETOP PLAYERS

OmniTactica satisfies the core competitive desires of tabletop players, elevating their tournament experience before, during, and after every event:

Personal Skill Progression & Elo Ratings

Players take immense pride in their competitive journey. OmniTactica calculates a standardized, chess-grade Elo rating (Apprentice to Everchosen) from official BCP matches. Players can celebrate milestone promotions, track their rating trajectory over time, and see tangible reward for their tournament efforts.

Opponent Stats & Matchup Intelligence

Players love knowing who they are playing against. OmniTactica provides instant visibility into opponent win rates, faction mastery, and head-to-head matchup history. It highlights favorite prey factions and toughest nemeses, helping competitors prepare strategically for their games.

Event Discovery & Community Search

Players want to find more places to play. OmniTactica features a built-in event discovery hub and local game store directory that helps competitors find upcoming RTTs, GTs, and local gaming clubs—complete with direct registration links.

HOW OMNITACTICA DIRECTLY DRIVES BCP REVENUE

OmniTactica connects player enthusiasm directly to BCP's monetization engines:

STEP 01

Opponent Scouting

A player checks their upcoming tournament round on OmniTactica and sees their opponent has an 85% win rate with Necrons.

High tactical curiosity.

STEP 02

List Interest Triggered

The player naturally asks: *"What units and enhancements are they running to win so consistently?"*

Urge to view the army roster.

STEP 03

Direct BCP List Funnel

OmniTactica provides an explicit button: **"View Full Army List on Best Coast Pairings"**, routing directly to BCP.

👉 Drives BCP Player Subscriptions!

STEP 04

Event Ticket Funnel

Looking to climb the Elo ladder, players find upcoming local BCP tournaments on OmniTactica and click **"Buy Ticket on BCP"**.

👉 Fills Brackets & Drives TO Subscriptions!

A COLLABORATIVE SUPPLEMENT, NOT A COMPETITOR

OmniTactica is purpose-built to complement BCP without overlapping with BCP's core business:

Platform Feature	Best Coast Pairings (Sole Authority)	OmniTactica (Community Companion)	Synergistic Value to BCP
Tournament Pairings & Rounds	✓ Sole Authority (Swiss pairing algorithm, round clocks, check-ins)	✗ Does Not Execute Pairings	Protects BCP's core role as the official event management tool.
Army List Hosting	✓ Sole Repository (Gated behind BCP player subscription)	✗ Never Hosts Paywalled Lists (Deep-links to BCP)	Preserves and multiplies BCP's player subscription revenue.
Elo Ratings & Growth Tiers	— Standard event standings	✓ Persistent Elo Engine (Tracks milestones, tier ranks, decay)	Gives players year-round reasons to care about every BCP match result.
Opponent Scouting & Matrices	— Raw score sheets	✓ Matchup Matrices (Faction records, nemesis armies, head-to-head)	Drives pre-match excitement and prompts list inspection on BCP.
Event Discovery Hub	✓ Official Event Host (Ticketing & registration)	✓ Regional Promotion (Directs players to BCP ticket checkout)	Fills tournament tables faster for TOs, boosting BCP's platform value.

TECHNICAL ARCHITECTURE & SECURITY PRINCIPLES

A lightweight, secure integration that imposes zero operational burden on BCP:

Zero Client-Side Writes

The client UI has zero write access to BCP or our database. All tournament ingestion is handled strictly via secure, read-only backend sync jobs.

Zero Server Burden on BCP

All Elo calculations, matchup matrices, and search queries run on OmniTactica's serverless Google Cloud infrastructure.

Co-Branding & Attribution

Direct Roster Links

Player profiles and tournament cards feature *"Verified Match Data powered by Best Coast Pairings"* with direct links back to BCP.

List inspection buttons route directly to BCP, respecting BCP's subscription paywall for viewing full army lists.

LET'S COLLABORATE TO GROW THE HOBBY

We would love to discuss an official read-only data partnership pilot to help BCP increase player list-view subscriptions and boost tournament turnout.
