OMNITACTICA × BEST COAST PAIRINGS

COLLABORATIVE PARTNERSHIP PROPOSAL

STRATEGIC PARTNERSHIP PROPOSAL

Bridging Players & BCP for Greater Engagement & Revenue

A non-competing engagement companion designed to accelerate BCP player list-view subscriptions and TO tournament adoption.

EXECUTIVE SUMMARY: PARTNERSHIP SYNERGY

Best Coast Pairings (BCP) is the premier authority for tabletop tournament registration, live Swiss pairings, and official roster submissions, monetizing through **Player Subscriptions (viewing army lists)** and **Organizer (TO) Subscriptions**. OmniTactica is purpose-built as an **engagement companion** that enhances both revenue streams. By utilizing official BCP match results via a read-only backend sync, OmniTactica gives players an Elo progression system, opponent scouting, and event discovery—creating a direct, daily funnel that drives players to subscribe to BCP to view lists and register for tournaments.

🏆 How OmniTactica Helps Tabletop Players

1. Standardized Elo & Personal Growth: Chess-grade ratings and tier milestones (Apprentice to Everchosen) giving permanent meaning to every BCP match result.

2. Opponent Stats & Matchup Scouting: Instant visibility into opponent win rates, top factions, and head-to-head records before round 1 to ease match anxiety.

3. Event & Community Discovery: Interactive local tournament and game store directory helping competitors find and enter nearby events.

📈 How This Directly Multiplies BCP Revenue

1. Direct List-View Funnel (Player Subs): Scouting an opponent's stats triggers immediate tactical curiosity. OmniTactica provides direct CTAs: *"View Full Roster on BCP"*, converting players into paying BCP subscribers.

2. Fills Tournament Brackets (TO Subs): Direct *"Register & Buy Ticket on BCP"* links fill event capacity faster, directly increasing TO retention and tier upgrades.

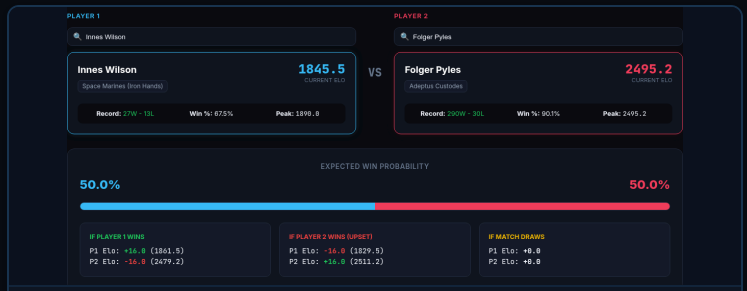

3. Zero Operational Burden: 100% read-only backend sync. Zero client-side writes. All compute runs on OmniTactica's cloud infrastructure with zero load on BCP.

Platform Feature Showcase (Live OmniTactica Views)

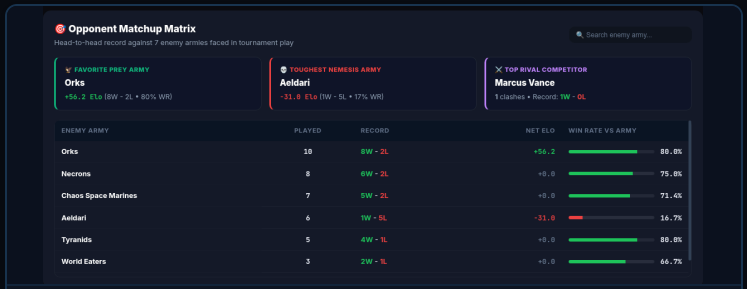

Real-time desktop data views driving engagement back to BCP

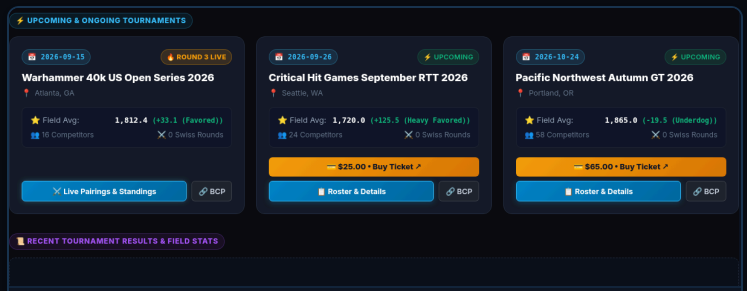

1. Player Hub & Career Progression: Standardized Elo rating (1845.5), High Warlord progress bar, verified BCP connection, and match history.

2. Tactical Match Predictor: Head-to-head win probability (Innes Wilson vs. Folger Pyles), expected Elo stakes (+16 / -16), and upset analytics.

3. Matchup Matrix & Nemeses: Highlights Favorite Prey (+56.2 vs. Orks) and Nemeses (-31.0 vs. Aeldari) with head-to-head records across tournament play.

4. Event Hub & BCP Ticketing: Upcoming tournament directory with field Elo ratings, live pairings, and direct "Buy Ticket" / "BCP" links filling brackets.

🛡️ Operational Demarcation: Pure Collaboration, Zero Competition

Tournament Authority

BCP retains 100% authority. OmniTactica has zero pairing or tournament management tools.

List Paywall Protection

OmniTactica never hosts paywalled lists. All roster inspection deep-links directly to BCP's subscription tier.

Read-Only Security

Zero client-side writes. Match records are ingested strictly via backend batch sync with official BCP attribution.

🤝 **A Collaborative Mindset — Open to Adjustments & Improvements:** OmniTactica is built to empower the tabletop community in partnership with BCP. We view this as a flexible, ongoing collaboration and are completely open to feedback, feature improvements, custom UI adaptations, co-branding integration, or workflow adjustments to ensure this partnership delivers maximum value and revenue for Best Coast Pairings.
